

# 3 AND 5 M<sup>3</sup> EXTRA-FLAT TANK

RAINWATER STORAGE TANK  
POLYETHYLENE (PE)  
IN-GROUND OR ABOVE-GROUND INSTALLATION

**6020-PLA**

## 1 Technical definition

Extra-flat storage tank in non-food-grade black high-density polyethylene for effluent or runoff.

Screw-on lid.

Tanks can be twinned (refer to optional twin kit).

## 2 Maintenance

The reservoir requires no special maintenance. It simply needs to be drained periodically.

## 3 Fence

In the absence of a self-supporting reinforced concrete slab, and if there is a risk of vehicle traffic, we strongly recommend fencing off the area around the structure.

## 4 Installation

SIMOP extra-flat tanks can be installed above or below ground. In the latter case, please refer to the PHPEPLA installation instructions.

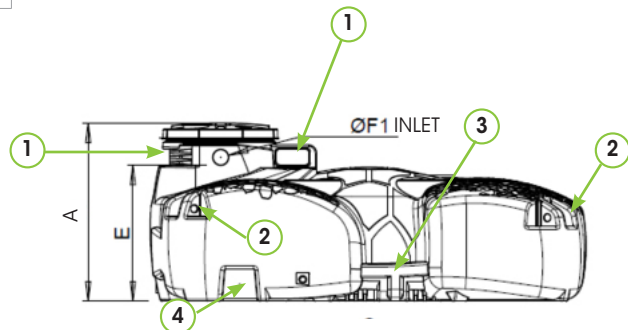

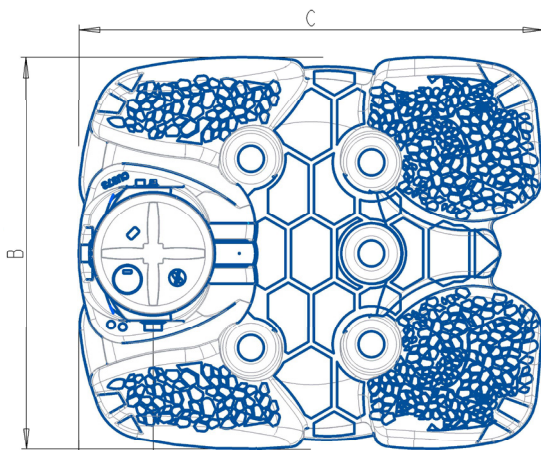

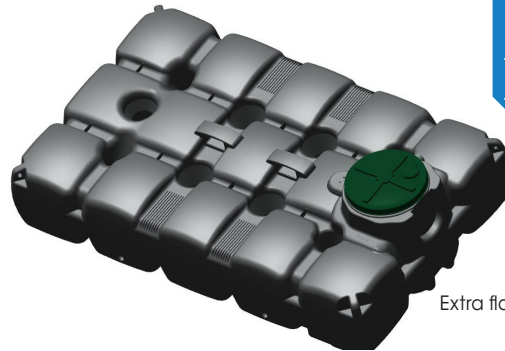

Extra flat tank 3m<sup>3</sup>
